Severe Weather Outlook Thursday, May 11, 2017

Hazardous Weather

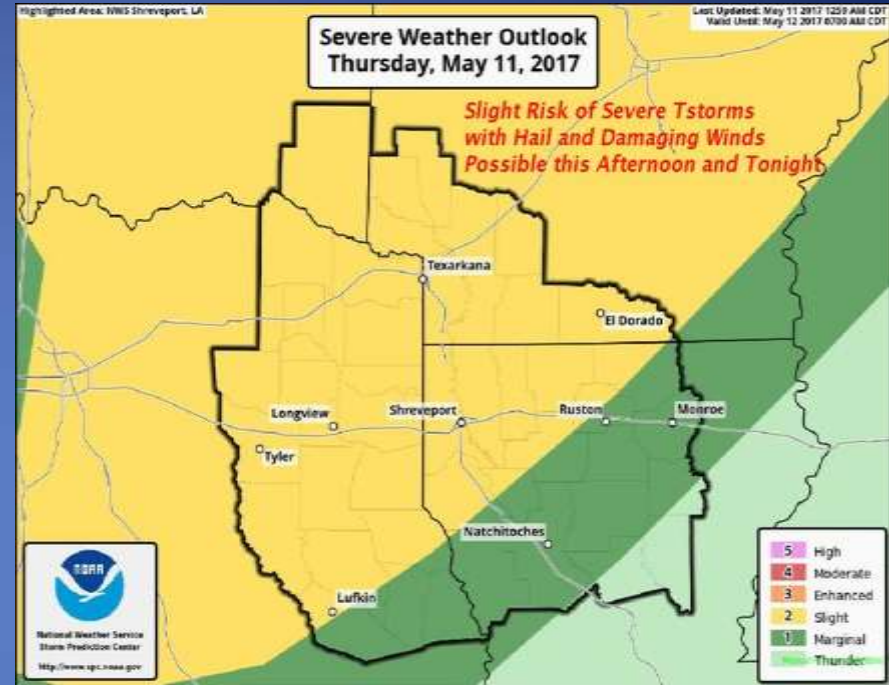

Additional showers and thunderstorms are expected to develop this afternoon along an approaching dryline and cold front. Some of these storms will be severe. Similar to previous events, there is some uncertainty as to exactly where storms will initially develop, but right now we think it will be somewhere along or east of I-35 during the early to mid afternoon hours. These storms will increase in coverage and move east through the early evening.

Hazardous Weather

As we get into late afternoon and early evening, thunderstorms are expected to increase in coverage and move east. Severe thunderstorms are expected through the evening hours. Areas east of I-35 will have the best chance for severe thunderstorms through late evening. Large hail and damaging winds will be the main threats with these storms.

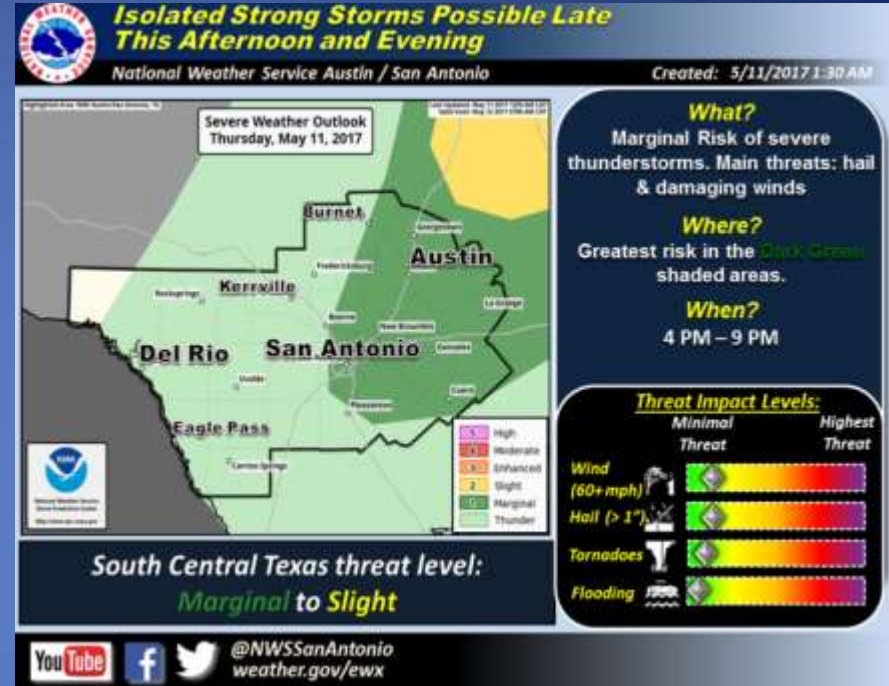

Severe thunderstorms will be possible across parts of eastern Oklahoma and Texas into Arkansas and northern Louisiana this afternoon and tonight. The main threats with storms will be large hail and damaging wind gusts.

Hazardous Weather

After showers cross the area very early this morning, rain chances will continue, primarily north of Houston. Though it may be tough to get a storm, any storms that do form will have the potential to be strong or even severe.

Strong storms will be possible this afternoon and evening mainly for locations in dark green. Hail and damaging winds will be the main threats for any severe weather.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
05/10/17	Flood Warning Continues	Newton County
05/10/17	Severe Thunderstorm Warning	Armstrong, Briscoe, Callahan, Carson, Childress, Collingsworth, Cottle, Donley, Edwards, Hall, Hardeman, Haskell, Hutchinson, Jones, Kinney, McCulloch, Moore, Motley, Potter, Randall, Reagan, San Saba, Shackelford, Sherman, Swisher, Taylor, Throckmorton, Uvalde, Val Verde, and Wilbarger Counties
